Mr. Neil Simmons  
Moab District  
San Rafael Resource Area  
900 North 700 East  
Price, UT 84501

SUBJECT: Details on amendment to G-P San Rafael Quarry Plan of operation  
dated August 25, 1992. UTU 69850

Dear Mr. Simmons:

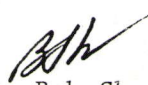

The following are the details:

1. The size of amended quarry areas is 250 feet wide and 1000 feet long on both the east and west of the county road. Please note the sketch.
2. The location of the roads:
  - a. West of county road:  
The extent of drywash upstream is limited (wash originates approximately 1000 ft up stream) and since the floor of the wash is Gypsum when extracted Quarry Floor would be lower than drywash, we propose to direct the run-off into quarried area.
  - b. East of county road:  
The crossing would be directly across our existing quarry entry on the west side. The fence crossing would be replaced by either a gate or cattle crossing
4. The location of topsoil and cryptogamie soil stockpiles are shown on the enclosed sketch.

Thank you for your continued cooperation and assistance in this regard.

Very truly yours,

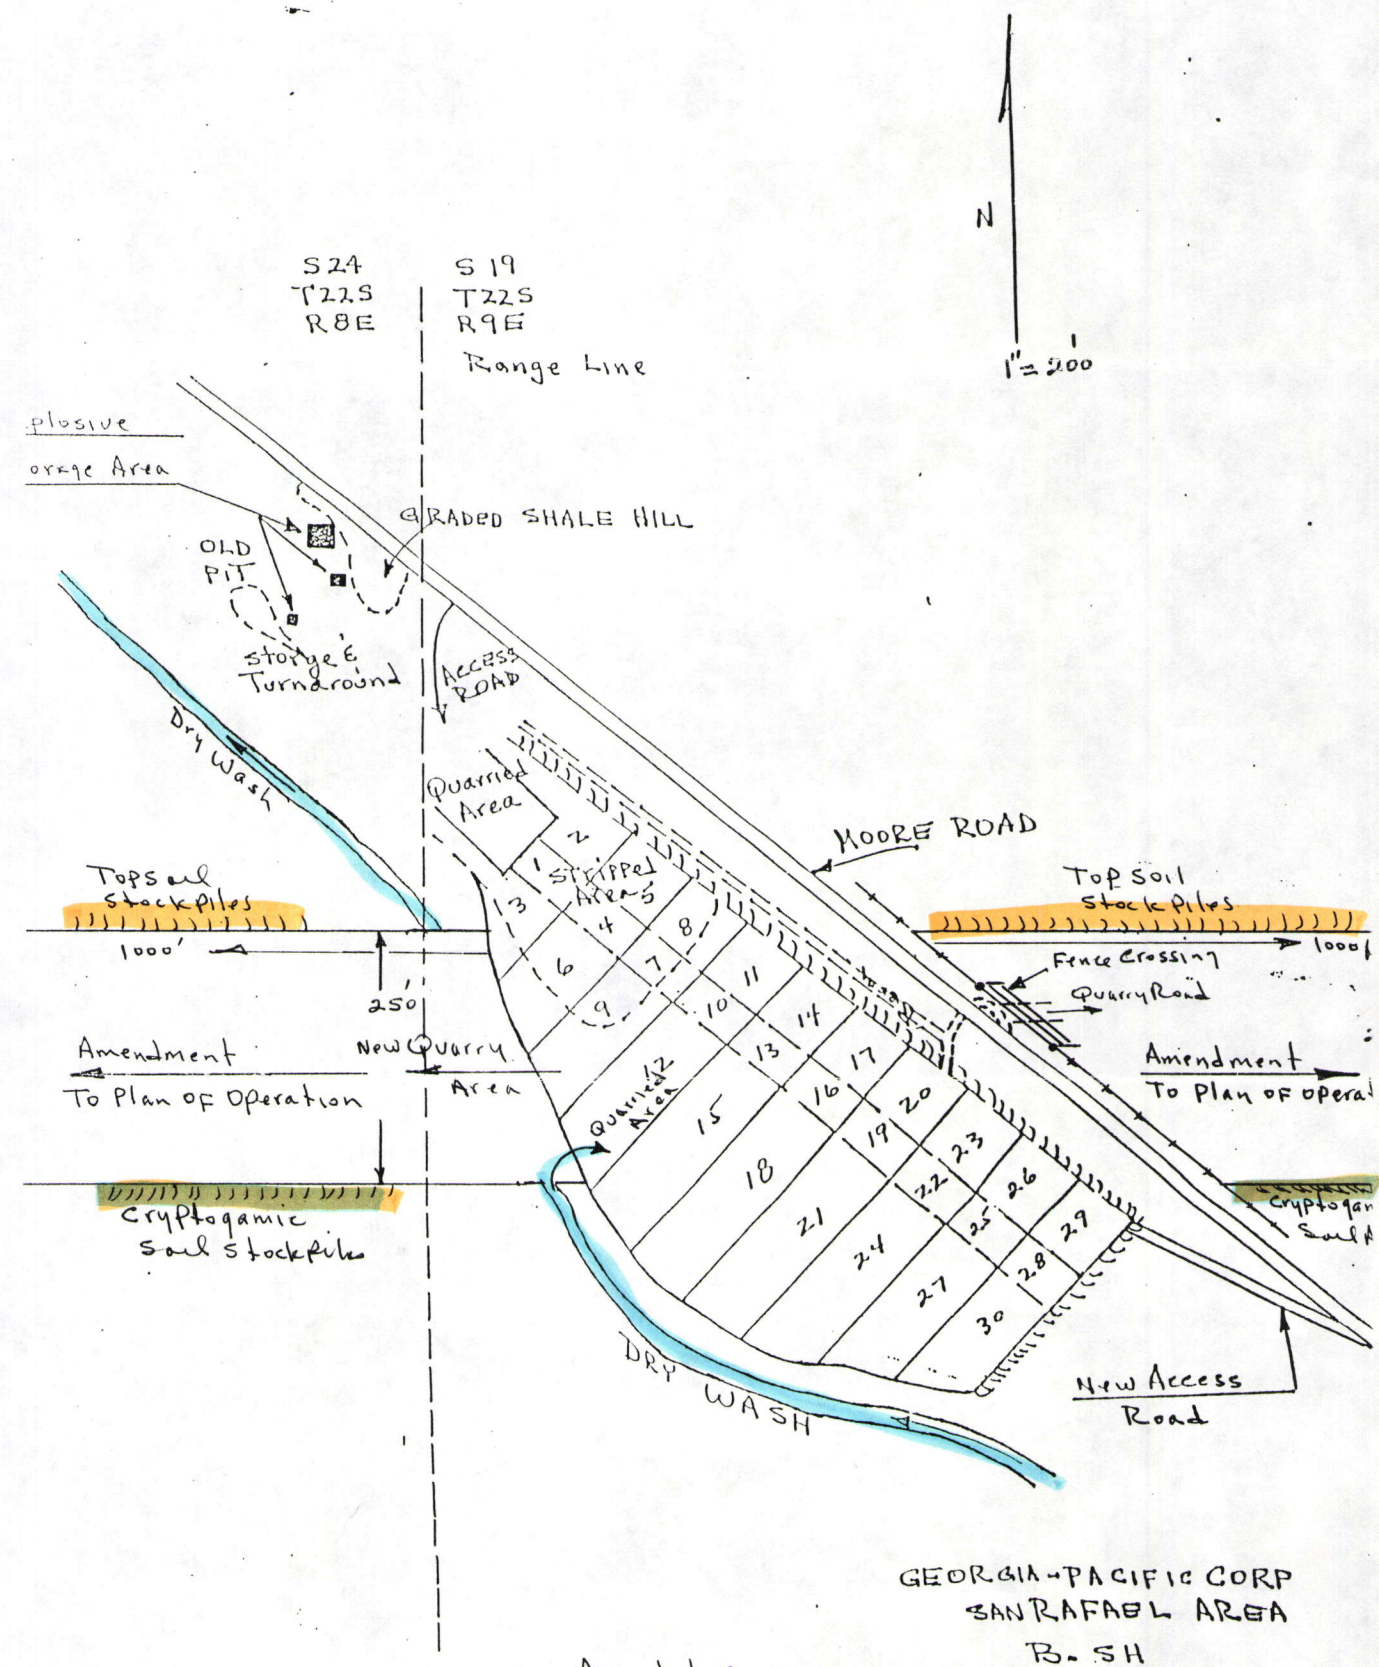

GEORGIA-PACIFIC CORP.
